The following is an examiner's statement of reasons for allowance:

This prior art fails to teach the electrochemical reduction of the diazonium salt that leads to binding of the aromatic group of this salt to the surface of the carbon containing carried out in an aprotic medium which contains neither any nucleophilic compounds nor any ethylenic compounds nor any species capable of reacting with the neutral radical faster than this radical binds to the carbon-containing surface, and to perform the process at a potential which is more negative than the reduction potential of the diazonium salt.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
